LinkedIn: linkedin.com/in/priyasharma | GitHub: github.com/priyasharma

## PROFESSIONAL SUMMARY

Experienced Python Developer with 4 years of expertise in building scalable web applications and RESTful APIs. Proficient in Django, Flask, and cloud technologies with a strong background in backend development and microservices architecture.

### **TECHNICAL SKILLS**

Programming Languages: Python, JavaScript, Java, SQL

Frameworks: Django, Flask, FastAPI, React

Databases: PostgreSQL, MySQL, MongoDB, Redis Cloud Platforms: AWS (EC2, S3, Lambda, RDS), Azure

Tools & Technologies: Docker, Kubernetes, Git, Jenkins, CI/CD Other: RESTful APIs, Microservices, Agile, Scrum, Unit Testing

## PROFESSIONAL EXPERIENCE

Senior Python Developer | TechCorp Solutions | Mumbai | 2022 - Present

- Developed and maintained 5+ microservices using Python and Flask framework
- Designed RESTful APIs handling 10,000+ daily requests
- Implemented caching strategies using Redis, improving response time by 40%
- Deployed applications on AWS using EC2, RDS, and S3 services
- Led a team of 3 junior developers in Agile environment
- Wrote comprehensive unit tests achieving 85% code coverage

## Python Developer | Digital Innovations | Pune | 2020 - 2022

- Built backend services using Django framework for e-commerce platform
- Integrated PostgreSQL and MongoDB databases for data management
- Implemented authentication and authorization using JWT tokens
- Collaborated with frontend team to ensure smooth API integration
- Optimized database queries reducing load time by 30%

## Junior Developer | StartupHub | Bangalore | 2019 - 2020

- Assisted in developing Python scripts for data processing
- Created API documentation using Swagger
- Participated in code reviews and sprint planning
- Fixed bugs and improved application performance

## **EDUCATION**

Bachelor of Technology in Computer Science | Mumbai University | 2015-2019 | CGPA: 8.5/10

# **PROJECTS**

- E-commerce API Platform: Built scalable REST APIs using Flask and PostgreSQL
- Real-time Chat Application: Developed using Python, WebSocket, and Redis
- Data Analytics Dashboard: Created using Django, JavaScript, and D3.js

### **CERTIFICATIONS**

- AWS Certified Developer Associate
- Python Professional Certificate Coursera
